Einladung zum Webinar 9. Juli 2021, 14 Uhr:

„Recent data about coronary revascularization and medical therapy: implications in clinical practice“

Anmeldung unter <https://anginaupdates.org/>. Weitere Info siehe unten.

Angina Updates is an educational initiative developed by the Translational Medicine Academy (TMA) bringing together an international working group of **independent medical experts** specializing in Chronic Coronary Syndromes (CCS) and Angina.

Its mission is to bring the latest education about Angina to healthcare professionals worldwide.

“Angina management in clinical practice : from prevention to symptoms control”

In this webinar, around 500 participants attended. This Webinar was chaired by Pr. Nedoshivin, Pr. Rosano and Pr. Kumar talked about the management of angina in clinical practice especially about preventive therapy and symptoms for **control of dyslipidemia and hypertension**.

According to new guidelines, they discussed the importance of lipid control and arterial hypertension for decrease cardiovascular risks and then optimize the medical therapy for CAD prevention. Through clinical case, they also debated on the symptom control, investigation and the adequate treatment of Angina.
